

TITLE: - BASICS EXCERCISE

AIM: -

To perform some basics exercise in github

DESCRIPTION:

1. Create a new repository locally on your machine.

```
Microsoft Windows [Version 10.0.26200.8246]
(c) Microsoft Corporation. All rights reserved.

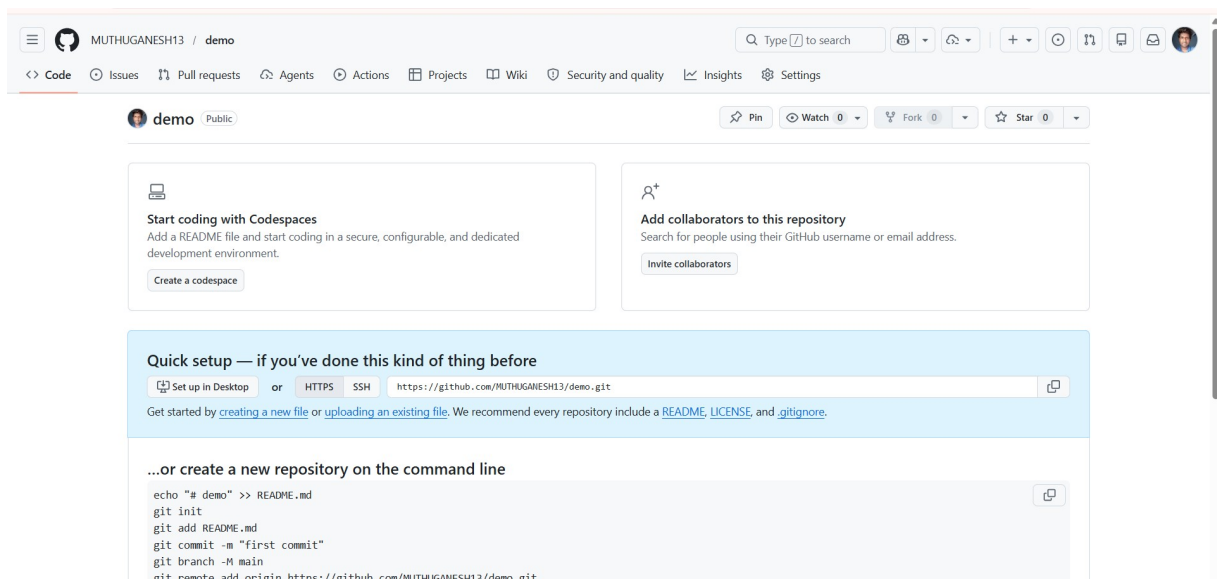

C:\Users\muthu>mkdir demo

C:\Users\muthu>cd demo

C:\Users\muthu\demo>git init
Initialized empty Git repository in C:/Users/muthu/demo/.git/

C:\Users\muthu\demo>
```

2. Create a new Github repository. Name it whatever you want.

3. Connect your local repo to the Github repo.

```
C:\Users\muthu\demo>git remote add origin https://github.com/MUTHUGANESH13/demo.git  
  
C:\Users\muthu\demo>git remote -v  
origin https://github.com/MUTHUGANESH13/demo.git (fetch)  
origin https://github.com/MUTHUGANESH13/demo.git (push)  
  
C:\Users\muthu\demo>
```

4. Optional: rename the default branch from master to main.

```
C:\Users\muthu\demo>git branch -M main  
  
C:\Users\muthu\demo>
```

5. Make a new file called favorites.txt Leave it empty. Make your first commit on the main branch.

```
C:\Users\muthu\demo>git branch -M main  
  
C:\Users\muthu\demo>type nul > favorites.txt  
  
C:\Users\muthu\demo>git add favorites.txt  
  
C:\Users\muthu\demo>git commit -m "Initial commit with empty favorites file"  
[main (root-commit) ff437bf] Initial commit with empty favorites file  
1 file changed, 0 insertions(+), 0 deletions(-)  
create mode 100644 favorites.txt
```

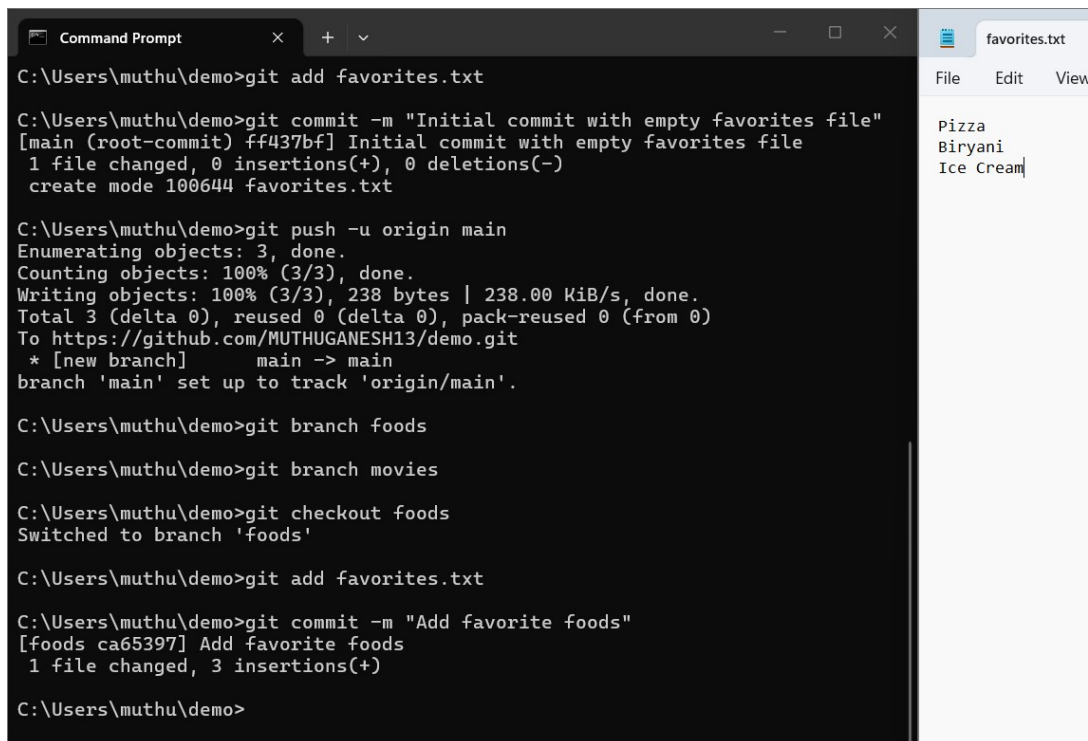

6. Push up your main branch to Github! Make sure you see your empty favorites.txt file on Github.

```
C:\Users\muthu\demo>git push -u origin main  
Enumerating objects: 3, done.  
Counting objects: 100% (3/3), done.  
Writing objects: 100% (3/3), 238 bytes | 238.00 KiB/s, done.

To https://github.com/MUTHUGANESH13/demo.git  
* [new branch]      main -> main  
branch 'main' set up to track 'origin/main'.
```

7. Next, create two branches: foods and movies

```
C:\Users\muthu\demo>git branch foods  
C:\Users\muthu\demo>git branch movies
```

8. Switch to the foods branch. Add three (or more) of your favorite foods to the favorites.txt file.
Add and commit your changes on the foods branch.

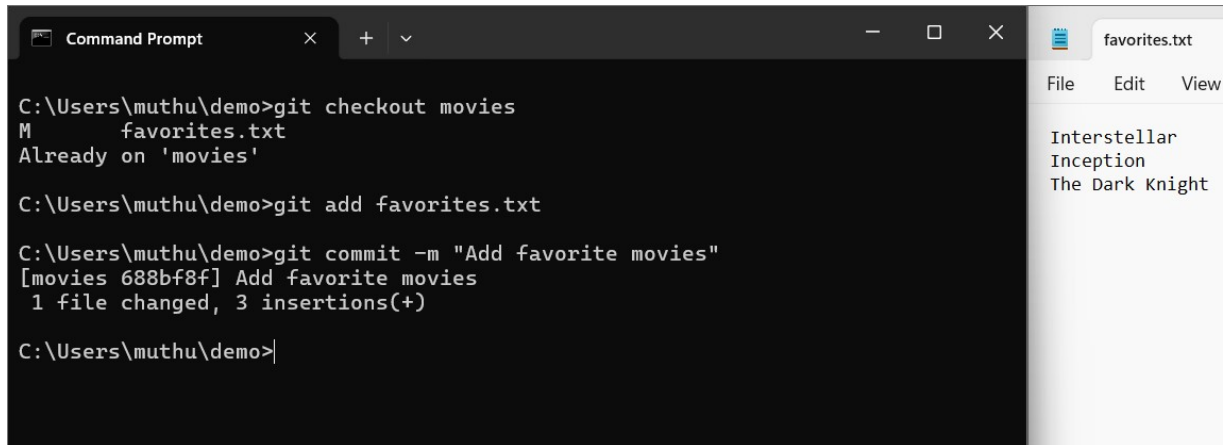

The screenshot shows a Windows Command Prompt window and a text editor window. The Command Prompt window displays the following commands and output:
